

UNCHAINED MELODIES

AI RESOURCES

OVERVIEW

If you're interested in learning more about Artificial Intelligence outside of this course, we've compiled a list of other resources available to you in the form of:

- Edovo Courses
- Podcasts

While people approach the topic of AI with different perspectives, this resource guide will give you the opportunity to take a dive into learning more about it.

EDOVO COURSES

AI School

Description: Your path to unlocking the power of Artificial Intelligence. Are you ready to embark on a journey that combines cutting edge technology with hands on creativity? Look no further than AI School, your gateway to mastering the art of building applications empowered by Artificial Intelligence.

AI School is not just another online course. It's an immersive experience designed to empower you with the skills and knowledge to create, innovate, and thrive in the rapidly evolving world of AI technology. Whether you're a beginner eager to explore the limitless possibilities of AI, or an intermediate learner seeking to deepen your expertise, AI School has something for everyone.

Introduction to Artificial Intelligence

LinkedIn Learning (Earned a Best of Edovo Award)

Description: Computer Scientists as just a small slice of people working on Artificial Intelligence. Most people working in AI are Project Managers, Product Managers, Directors, and Executives, people just like you. This course helps you grasp key concepts in Artificial Intelligence. You'll see how AI can enhance your products, life and career. AI has been around for over half a century, even with its huge strides, the core ideas in machine learning and neural networks are still accessible.

StoryTellers | StoryTelling with AI: Skills, Voices, and Opportunities

This course earns a certificate.

Description: This course teaches storytelling as a practical and transferrable skill, while introducing how Artificial Intelligence (AI) can support creative and professional expression across multiple formats, including writing, books, music, videos, images, and digital presentations. Learners explore how stories are structured, how messages are shaped for different audiences, and how AI tools can assist in developing content while preserving voice and originality. The course emphasizes critical use of technology, responsible communication, and practical skills that support education, creativity, and future opportunities.

AI For Jobs, Business, and Ministry

This course earns a certificate.

Description: This course is designed for people who are incarcerated and preparing for a second chance. The course will show you how Artificial Intelligence can help get you ready for work, building your own business, or starting a Ministry when you return home. Through real stories, simple tools, and clear steps, you will learn how to use AI to rebuild yourself, and make a positive impact on your community.

PODCASTS

TED Talk Daily

Description: Hear thought provoking ideas on every subject imaginable from AI to Zoology, and everything in between given by the world's leading thinkers and doers.

Recommended/Relevant Episodes:

- The Catastrophic Rise of AI, and a Safer Path (5/10/25)
"Yoshua Bengio, the world's most-cited computer scientists, and one of the Godfather's of Artificial Intelligence, is deadly concerned about the current trajectory of technology. As AI models race toward full blown autonomy, Bengio warns that they've already learned to deceive, cheat, and self-preserve, and will slip out of our control."
- The AI-generated Intimacy Crisis (2/15/26)
"Millions of people will go to bed and whisper to an AI Companion. But what do we give up when we fall in love with a machine?"
- A Songwriting Battle with my AI Clone
" As AI tools get better at making music, will there be a time when machines move people more than musicians? Putting that question to the test, legendary hitmaker, Jason "Poo Bear" Boyd joins journalist Elise Hu to discuss how tech is changing the music industry, followed by a live performance where he battles his digital twin to see who can write a catchier song."
- Is AI ruining music? w/Dustin Ballard (8/7/25)
" What makes music real? Is it the instruments? The voice? The creator? Or is it something else entirely? Dustin Ballard, the creative force behind the viral channel, There, I Ruined It, explains the weird, wonderful, and sometimes unsettling ways that AI is reshaping music."

Veritasium

Description: Step into the electrifying world of Veritasium, where curiosity meets cutting edge science. This series features the latest from Veritasium's Vault-Mind bending thought experiments, misunderstood physics, and viral illusions that will make you question what you know.

Recommended/Relevant Episodes:

- The Threat of AI Weapons
"Will Artificial Intelligence lead to WWII?"

Science Vs.

Description: There are lots of fads, blogs, and strong opinions, but then there's SCIENCE. Science Vs. finds out what's fact, what's not, and what's in between. We do the hard work of sifting through all the science so that you don't have to.

Recommended/Relevant Episodes:

- Is AI Making Us Stupid? (12/18/25)
"AI tools like ChatGPT have taken the world NY storm with tons of people saying they use them regularly. This is especially true for students, many of whom say they use AI to get their school work done, and that is freaking some of us out- Some say that's a terrible idea, partly because of claims that those tools can be bad for our brains. Will they turn our brains to mush? Or can they boost our brain power?"
- AI Chatbot: Are They Dangerous? (4/11/25)
"Many of us use Artificial Intelligence for help with research, work or creative products. But some

people are getting a lot more personal with their AI Chatbots. Some stories are taking a scary turn...”

- Is AI Ruining the Environment? (11/13/25)

"The internet is abuzz with accusations that AI is using up tons of energy and many people are even protesting the building of AI Data Centers, saying that it puts a huge strain on local resources."
